CONTENTS

Special Issue II
Model Selection, Model Diagnostics, Empirical Bayes and Hierarchical Bayes

Edited by P. Lahiri

Volume 112, Numbers 1–2

Preface	*P. Lahiri*	1
Prediction of nonlinear spatial functionals	*J. Aldworth and N. Cressie*	3
Empirical Bayes estimation smoothing of relative risks in disease mapping	*J.L. Meza*	43
On measures of uncertainty of empirical Bayes small-area estimators	*F.B. Butar and P. Lahiri*	63
A note on linear empirical Bayes estimation of finite population means	*M. Mashayekhi*	77
Estimation of small-area proportions using covariates and survey data	*M.D. Larsen*	89
Modeling heavy-tailed correlated noise with wavelet packet basis functions	*P. Gendron and B. Nandram*	99
Estimating Bayesian credible intervals	*L.E. Eberly and G. Casella*	115
Noninformative priors, credible sets and Bayesian hypothesis testing for the intraclass model	*M. Ghosh and J. Heo*	133
A new formulation of stress–strength reliability in a regression setup	*T. Banerjee and A. Biswas*	147
A Bayesian semiparametric transformation model incorporating frailties	*B.K. Mallick and S. Walker*	159
On propriety of posterior distributions of variance components in small area estimation	*G.S. Datta and D.D. Smith*	175
A simulation study of a proposed graphical diagnostic for assessing goodness-of-fit	*L.A. Peternelli and C.H. Osório Silva*	185
A decision theoretical approach to wavelet regression on curves with a high number of regressors	*M. Vannucci, P.J. Brown and T. Fearn*	195
On the model selection to represent human capital distribution—an empirical study	*D. Bandyopadhyay*	213
Efficient model-fitting and model-comparison for high-dimensional Bayesian geostatistical models	*M.K. Cowles*	221
Approximations and consistency of Bayes factors as model dimension grows	*J.O. Berger, J.K. Ghosh and N. Mukhopadhyay*	241
